

Credit appraisal that writes itself.

AI drafts the credit appraisal memo for new vehicle loans. The lender's own policy makes the decision.

THE PROBLEM

Underwriting is the slow step

25–40

credit appraisal memos an officer builds by hand, every working day

Re-keying

Bureau reports, bank statements and salary slips typed into the memo by hand

Inconsistency

Two officers can read the same file two different ways

Audit load

Reasons and deviations are pieced together after the fact

WHAT CERCIT IS

An AI co-pilot that drafts the memo, not the decision

Document AI

Reads PAN, salary slips, Form 16 and bank statements, and cross-checks them

Data engine

Turns bureau and bank data into income, FOIR and repayment behaviour

Risk model

Scores default risk from past patterns and shows the reasons

Policy engine

Runs the lender's own versioned rules. The decision is made here.

AI assists. Policy decides. People handle the exceptions.

HOW IT DECIDES

Six checks for every file

01

Hard filters

KYC, age, negative list

02

Bureau

CIBIL band, DPD, enquiries

03

Income

FOIR, surplus, salary pattern

04

Collateral

LTV on a known car price

05

Risk model

Default probability, explained

06

Policy verdict

Approve, review or decline

WHERE WE ARE

Built, and tested on synthetic data

18

live screens for customers and credit officers

22

database tables, with versioned policy and an audit trail

0.91

risk model AUC on 10,000 synthetic borrower profiles

40/40

policy test scenarios passing, from clean files to hard declines

WHY NOW

The rails for digital credit are in place

Account Aggregator

Consent-based bank data in minutes, instead of PDFs sent by email

RBI digital lending

Lenders must explain decisions and keep a trail. cercit is built around both.

Bureau and KYC APIs

CIBIL, PAN and Aadhaar checks available on demand

Retail loans in India stand at ₹68.5 lakh crore, growing 14.4% a year, with vehicle loans among the steady growers.

BUSINESS MODEL

A platform fee, plus a fee per memo

How we charge

Platform fee · ₹50,000 per lender a month

Per memo · ₹150 per credit appraisal

Onboarding · ₹3 lakh one-time, policy setup

Where we grow

Now · New cars, salaried borrowers

Next · CV, 3W, self-employed, co-applicants

Later · Used vehicles, full auto-decisions

LET'S TALK

If you see a business here, get in touch

cercit is a project by Sameer Shreenivas Mittimani, built from years of hands-on work in vehicle finance.
